The Easiest Gmail SMTP Configuration for WordPress

Experience seamless email delivery and improve your sender reputation with our powerful Gmail integration for WP Mail SMTP.

Reliable Sending

Send emails directly through Gmail's servers for consistent and dependable delivery, avoiding common WordPress email issues.

Improved Deliverability

Leverage Gmail's reputation to bypass strict email filters and land in your recipients' inboxes, not their spam folders.

Simple Setup

Easily connect WP Mail SMTP to your Gmail account with our straightforward setup wizard – no technical expertise needed!

Enhanced Security

Benefit from Gmail's robust security measures to protect your emails and ensure they reach their destination safely.

No More Email Headaches

Say goodbye to WordPress email problems and enjoy peace of mind knowing your messages are being sent and delivered.

Focus on What Matters

Leave the complexities of email delivery to us and focus on growing your business and engaging your audience.

Boost Engagement & Sales

Increase open and click-through rates by ensuring your transactional emails, newsletters, and notifications reach your audience.

★★★★★

"I use this plugin on several sites, and it always works flawlessly. It's perhaps one of the most useful plugins for anyone who needs to have a WP site respond to forms or payments. "

Improve Your Email Deliverability Today

Get WP Mail SMTP and ensure your emails reach the inbox every time.

Effortless Email Sending With Gmail

The WP Mail SMTP Google Workspace / Gmail Mailer ensures your emails reach the inbox by sending them through your own Gmail account.

Why Use Your Gmail Account to Send Emails?

Many WordPress hosting providers don't properly configure their email settings, leading to deliverability problems. By using Gmail, you can:

> **Improve Deliverability:** Send emails using Gmail's trusted servers, increasing your chances of reaching the inbox.

> **Stop Email Headaches:** Say goodbye to complicated SMTP setups and troubleshooting email issues.

> **Focus on Your Site:** Spend less time worrying about emails and more time creating great content and growing your audience.

The WP Mail SMTP Gmail Mailer is the easiest way to send WordPress emails reliably and focus on what truly matters.

## Perfect for All Types of WordPress Sites

No matter what kind of WordPress website you have, the WP Mail SMTP Gmail Mailer can help you send emails reliably and effortlessly.

WordPress Blogs: Ensure your subscribers never miss a new blog post notification.

eCommerce Websites: Send order confirmations, shipping notifications, and other transactional emails without a hitch.

Membership Sites: Deliver a seamless experience to your members with reliable email communication.

Business Websites: Build trust and engagement with your audience by ensuring your emails always reach their inbox.

Advanced Features for Reliable Email

WP Mail SMTP offers more than just basic SMTP setup. Explore the advanced features designed to elevate your email deliverability and streamline your workflow.

Smart Routing

Optimize email delivery by directing emails through the best available connection.

- ✓ Route emails based on custom conditions like content or recipient.
- ✓ Safeguard delivery by switching to backup connections automatically.
- ✓ Improve email reliability with tailored routing rules.

Backup Connections

Ensure reliable email delivery with a secondary connection.

- ✓ Automatically switch to a backup SMTP connection if the primary fails.
- ✓ Maintain uninterrupted email flow with multiple connection options.
- ✓ Easily set up and manage backup connections from the dashboard.

Email Controls

Take full control over which emails are sent from your site.

- ✓ Enable or disable specific WordPress-generated emails.
- ✓ Protect your domain reputation by controlling email output.

★★★★★

"This plugin makes email for developers a breeze. I love that I can define how WordPress sends out mails and that I can test that my emails will work. Thanks for the awesome plugin."

valour47

★★★★★

"I use WP Mail SMTP (with Brevo, btw) for all my clients and on all my sites. The documentation is easy to follow and there have been 0 errors sending email from any of my websites."
